

HistoMatch(for stacks)

S. Nowotarski (2018)

stn@stowers.org

ABOUT

This macro adjusts the histograms on individual slices in a stack to more closely match a reference slice within the stack. This is good for reducing flickering and some long term drift in movies. Originally used for processing 3View SBFSEM images.

REQUIREMENTS

This macro requires the data to be in a stack format. Requires version 1.45f.

REFERENCE

If you use this macro please cite: **TBA**
